

Feed Requirement and Purchasing Report

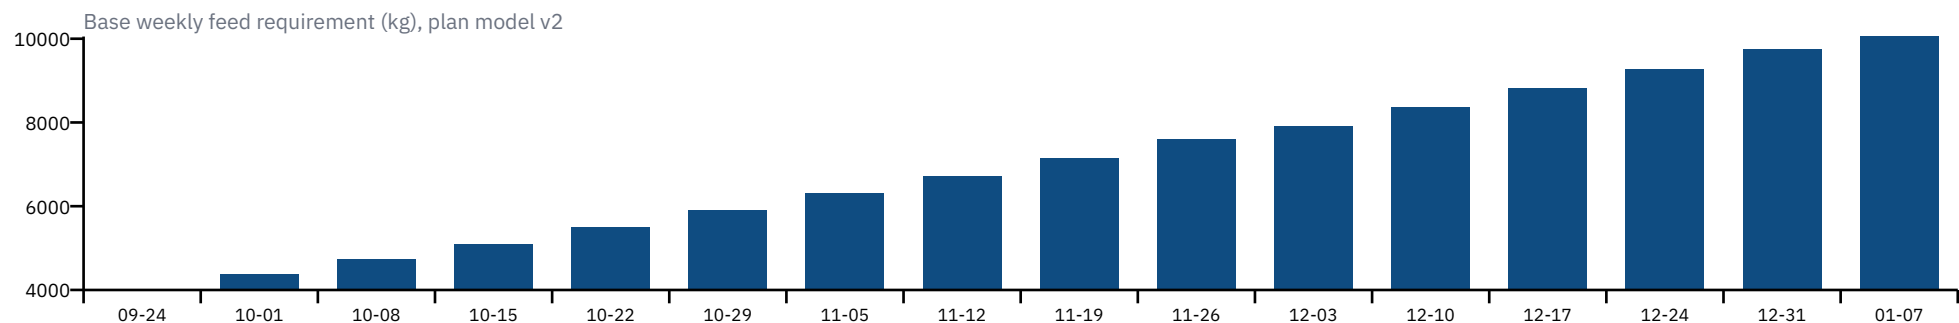

How much feed should we order, and when?

9,014 kg fed 24 Aug-23 Sep (recorded)	19,475 kg model-implied next 30 days	0.46x observed / model feed ratio	0 kg incoming orders recorded	30-90 days supplier lead times
---	--	---	---	--

Why forecasts differ: the plan's weekly feed is derived as model growth gain x the model's biological FCR (1.239 to 1.881). It starts from model ABWs that exceed measured ABWs, so it asks for about 2.2x the feed the farm actually fed last month. The 'slower' scenario scales the model to the observed pace; 'faster' adds 15% for growth catching up.

Weekly feed requirement, base scenario (kg) by pellet size

Week starting	Total	0.5-1.0 mm	1.0-1.5 mm	2 mm	3 mm	4 mm
2026-09-24	3,999	34	110	280	2,317	1,258

Stock cover and run-out by pellet size

Pellet	Stock lines	Book stock kg (23 Sep)	16-wk base need kg	Run-out: slower	Run-out: base	Run-out: faster
0.5-1.0mm	ft36, ft37	2,700	3,428	> 16 wk	2026-12-26	2026-12-17
1.0-1.5mm	ft17	1,817	2,425	> 16 wk	2026-12-29	2026-12-24
2mm	ft38, ft21, ft18	1,045	4,421	2026-12-18	2026-10-13	2026-10-11
3mm	ft39, ft19, ft22	7,325	20,066	2026-12-06	2026-10-21	2026-10-17
4mm	ft40, ft23, ft20	11,730	81,103	2026-11-17	2026-10-27	2026-10-24

Book stock is the feed_inventory_movement ledger to 23 Sep; negative lines are floored at 0. 4.5 mm Aller feed (ft23) is counted with 4 mm. Last physical stock count: 28 Aug (26 days earlier). No incoming deliveries are recorded (feed_incoming_delivery is empty).

Purchasing: order-by dates (run-out minus supplier lead time)

Pellet	Scenario	Run-out	Order by (De Heus Tanzania, 30 d)	Order by (De Heus Uganda, 60 d)	Order by (Aller Aqua, 90 d)
2mm	Slower (observed pace)	2026-12-18	2026-11-18	2026-10-19	2026-09-19 LATE
2mm	Base (plan model v2)	2026-10-13	2026-09-13 LATE	2026-08-14 LATE	2026-07-15 LATE
2mm	Faster (+15%)	2026-10-11	2026-09-11 LATE	2026-08-12 LATE	2026-07-13 LATE
3mm	Slower (observed pace)	2026-12-06	2026-11-06	2026-10-07	2026-09-07 LATE
3mm	Base (plan model v2)	2026-10-21	2026-09-21 LATE	2026-08-22 LATE	2026-07-23 LATE
3mm	Faster (+15%)	2026-10-17	2026-09-17 LATE	2026-08-18 LATE	2026-07-19 LATE
4mm	Slower (observed pace)	2026-11-17	2026-10-18	2026-09-18 LATE	2026-08-19 LATE
4mm	Base (plan model v2)	2026-10-27	2026-09-27 LATE	2026-08-28 LATE	2026-07-29 LATE
4mm	Faster (+15%)	2026-10-24	2026-09-24 LATE	2026-08-25 LATE	2026-07-26 LATE

Minimum order 25,000 kg (one 25 t container). Lead times from feed_supplier_purchasing_policy; which supplier delivers the Koudijs lines is not recorded, so all three are shown. LATE = order-by date is before the 1 Oct extract date.

Action: 2 mm feed (Koudijs, 1,045 kg) runs out first - mid-October on the plan's base requirement, mid-December at the pace actually fed. On the base plan an order with any listed lead time is already late, so bridge with the 1.0-1.5 mm Aller stock only for the smallest fish and confirm real consumption this week. 3 mm and 4 mm cover lasts into late October to December depending on the scenario; each reorder is a 25 t minimum.

Inventory snapshot
