

Data Exceptions and Monthly Close Report

Can management trust this month's numbers?

16 exceptions	4 high	10 medium	2 low / info	No numbers ready for sign-off
-------------------------	------------------	---------------------	------------------------	---

Exceptions register

#	Type	Severity	Detail	Owner (suggested role)	Status
1	Conflicting count	High	02.26cK: 1B -1,008, 1C -749 and 1A -11 book fish; reconciliation rows record confirmed 0 but ledger not adjusted	Farm manager	Open
2	Unexplained loss	High	02.26cK: 11,259 fish (673.8 kg) booked 'lost / unaccounted' on 28 Aug, entered 1 Sep outside the app form	Farm manager	Open
3	Unbalanced transfer	High	02.26cK transferred 37,209 fish out of 1C into G1.A; 1C held 36,460 (749 more fish out than in)	Data lead	Open
4	Forecast on obsolete assumption	High	Plan rev 6 starts 15 of 16 cages above measured ABW (up to 39%); model feed is 2.2x what was fed	Production planner	Open
5	Post-transfer mortality	Medium	02.26cK recorded 2,024 deaths in the window (2.8% of opening), the most of any batch, after the 1B/1C to G1.A transfers	Farm manager	Monitoring
6	Overdue / missing sample	Medium	05.26b / 2B: no 23 Aug sample (latest 23 Jul); 08.26 and 09.26a: no opening sample; 1B: last sample 14 Aug (30 fish)	Sampling lead	Open
7	Small sample	Medium	n < 150 at close: G1.D (100), 2C (100), 2D (100), 3D (125)	Sampling lead	Open
8	Unusual ABW change	Medium	2D 184.6 to 222.1 g in 20 days (n = 50 then 100); 2C 112.3 to 132.1 g in the same 20 days; G1.A 59.7 to 63.0 g in 12 days	Sampling lead	Open
9	Invalid / implausible harvest rows	Medium	03.26aK 13 Apr: 1,565 fish at 1.0 g/fish; 06.26a 17 Jun: 15 fish 0.025 kg; 08.26 22 Sep: 20 fish at 6.8 g - culls or samples coded as harvest	Data lead	Open
10	Batch stocked above delivery	Medium	08.26: stocked 19,861 vs delivered 18,254 (+1,607 on a second stocking record after 23 Aug)	Data lead	Open
11	Planned stocking not recorded	Medium	80,000 fish planned for 25 Sep (and 50,000 for 1 Oct) have no stocking record; the latest stocking record is 4 Sep (data to 29 Sep)	Production planner	Open
12	Invalid FCR	Medium	02.26cK, 05.26b, 08.26, 09.26a cannot support a ratio; eFCR on 02.26aK is 2.59 with n=100	Production planner	Open
13	Feed inventory conflict	Medium	Aller 2 mm 40% CP is -60.5 kg book; four Aller lines show 0 kg counted but 5,041 kg book; last count 28 Aug	Feed store	Open
14	Cycle records out of step	Medium	Cycles still ongoing in 1B, 1C and two in 2B though fish moved; cage statuses 'available'	Data lead	Open
15	Missing feed records	Low	09.26a fed on 19 of 20 days since stocking; all other batches fed all 31 days	Feed store	Open
16	Missing data classes	Info	No water quality rows, no physical count rows, no handling-time or stock-purpose fields	Farm manager	Open

Can management trust this month's numbers? Deaths, feed fed and harvest kg are recorded totals and reconcile to the source tables. Closing fish counts, biomass and FCR should not be treated as certified until the 02.26cK count, the 11,259-fish loss and the sampling gaps are resolved. Owners are suggested roles, not assigned people.

Comparison note: batch names match the Tanlake Samaki monthly report, but counts differ for the same date (for example 02.26b opening 14,081 here against 11,021 in the Tanlake report). This database is a separate dataset; do not mix the two when reconciling.
