TOTAL	397,540	7,221	0	11,259	2,297	1,775	389,430		

Expected closing = opening + stocked + external in - external out - deaths - harvest. Within-farm transfers cancel at batch level. Adjustments are only the recorded external_out reconciliation entry; no other adjustment rows exist. 'Verified count' = a physical count recorded in fish_inventory_count (none exist).

Discrepancies and investigation status

Cage / item	Date	Book balance / quantity	Confirmed count	Discrepancy (fish)	Recorded evidence	Investigation status
02.26cK / 1B	2026-08-28	-1,008	0 (user-confirmed empty)	+1,008	Reconciliation row recorded (count_difference); ledger balance not yet adjusted	Open - count evidence not attached
02.26cK / 1C	2026-09-11	-749	0 (final transfer)	+749	Reconciliation row recorded (count_difference); ledger balance not yet adjusted	Open - count evidence not attached
02.26cK / 1A	-	-11	-	-11	Residual from earlier movements; no reconciliation row	Open - not investigated
02.26cK / external_out	2026-08-28	11,259 fish (673.8 kg)	-	15.3% of batch opening	Booked as 'Lost / unaccounted - 1B transfer reconciliation' on 2026-09-01 (not via the app form)	Open - cause not established

Counting method and evidence: not recorded for any batch. The two reconciliation rows have no linked count (inventory_count_id is empty) and fish_inventory_count holds no rows. The closing figures above are book stock, not certified physical stock.

Cage-level closing book (2026-09-23)
