

Growth Against Target and Sampling Quality Report

Which batches are genuinely growing slowly?

16 / 16

cages sampled on 23 Sep

15 of 16

cages below plan ABW

14

cages with a quality flag

n = 100-500

sample size range

Not recorded

size distribution / sex

Actual ABW against the versioned growth curve (plan model tanganyika-planning-v2)

Batch	Cage	Samples (MM-DD)	Sample n	Prev ABW g	Latest ABW g	Gain g	SGR %/day	Plan ABW g 22 Sep	vs plan	Plan days to 400 g	Naive days at recent SGR	Quality flags
02.26aK	G1.D	08-23 to 09-23	125/100	65.2	82.9	17.7	0.77	107.5	-23%	131	203	small sample (n<150); below plan by >15%
02.26b	2C	09-03 to 09-23	100/100	112.3	132.1	19.8	0.81	146.2	-10%	109	136	small sample (n<150)
02.26b	2D	09-03 to 09-23	50/100	184.6	222.1	37.5	0.92	226.7	-2%	71	64	small sample (n<150)
02.26cK	G1.A	09-04 to 09-23	125/250	52.0	63.0	11.0	1.01	84.5	-25%	146	183	below plan by >15%; prior ABW from cage 1C before transfer
03.26aK	1A	08-23 to 09-23	250/250	35.2	47.2	12.0	0.95	64.7	-27%	161	226	below plan by >15%
03.26aK	1E	08-23 to 09-23	250/250	35.3	54.5	19.2	1.40	64.9	-16%	161	142	below plan by >15%
03.26b	3D	09-11 to 09-23	60/125	111.1	116.4	5.3	0.39	130.1	-11%	118	318	small sample (n<150)
03.26c	1D	08-23 to 09-23	125/250	64.8	96.0	31.2	1.27	107.0	-10%	131	113	-
05.26aK	3A	08-23 to 09-23	250/250	31.5	47.0	15.5	1.29	59.0	-20%	166	166	below plan by >15%
05.26b	2B	07-23 to 09-23	247/250	17.7	41.7	24.0	1.38	67.9	-39%	158	164	62-day interval; below plan by >15%
05.26cK	3B	08-23 to 09-23	250/250	25.3	34.3	9.0	0.98	49.3	-30%	175	250	below plan by >15%
06.26a	3C	08-23 to 09-23	250/500	13.6	22.1	8.5	1.57	29.5	-25%	199	185	fast gain - check outlier; below plan by >15%
07.26a	3E	08-23 to 09-23	500/500	6.2	11.5	5.3	1.99	15.3	-25%	225	178	below plan by >15%
07.26b	3F	08-23 to 09-23	500/500	5.0	10.5	5.5	2.39	12.9	-19%	231	152	below plan by >15%
08.26	1F	09-23	500	-	6.5	-	-	8.1	-20%	246	-	below plan by >15%
09.26a	2A	09-23	500	-	5.4	-	-	5.3	2%	259	-	-

SGR = $\ln(\text{ABW}_2/\text{ABW}_1) / \text{days} \times 100$. Plan ABW is the model's starting weight for each cage in draft plan rev 6 (snapshot 22 Sep). 'Naive days' extrapolates the latest SGR to 400 g and ignores slowing growth, so it is a lower bound. Individual fish weights are not stored, so size distribution and outlier fish cannot be assessed; outlier flags are based on the batch-level gain only.

Cohort comparison by source and age

Source	Stocking month	Cages	Book fish	Fish-weighted ABW g	Mean SGR %/day
Kipili Farm	2026-02	2	99,101	70.5	0.77
Kimbwela Hatchery	2026-02	2	13,971	160.4	0.87
Kipili Farm	2026-03	2	36,397	53.0	1.17
Kimbwela Hatchery	2026-03	2	19,137	99.2	0.83
Kimbwela Hatchery	2026-05	2	38,405	45.2	1.34
Kipili Farm	2026-05	1	29,796	34.3	0.98
Kimbwela Hatchery	2026-06	1	41,104	22.1	1.57
Kimbwela Hatchery	2026-07	2	87,872	11.1	2.19
Kimbwela Hatchery	2026-08	1	19,803	6.5	-
Kimbwela Hatchery	2026-09	1	5,612	5.4	-

Lagging batches: 05.26b / 2B (41.7 g, 39% below plan), 05.26cK / 3B (30% below) and 03.26aK / 1A (27% below) are furthest behind the model; 2A is the only cage at or above plan. G1.A (02.26cK) grew from 52.0 g (cage 1C, 4 Sep) to 63.0 g, but only 59.7 to 63.0 g (+5%) in the last 12 days, alongside the large post-transfer mortality in that cage. Sex composition is not recorded; cohorts are compared by supplier and stocking month only.
